

OWS 360 Injector Fuel System Cleaner

For Diesel and Gasoline Engines

Description

Highly effective combination of active agents for cleaning and protection. This product is formulated in accordance with the latest standard of fuel and additive technology and meets the requirements of today's engines, fuels and running conditions. Suitable for all gasoline fuel injection systems such as K, KE and LJetronic systems, etc.

Properties

- cleans the injection system
- reduces pollutant emissions removes carbon deposits from the intake valves and in the combustion chamber
- optimum dosage
- cost-effective due to exact dosage
- guarantees low fuel consumption
- tested for turbochargers and catalytic converters

Areas of application

For rectifying problems such as difficulties with starting, irregular idling, poor throttle response, performance losses, surges due to lean mixture and poor exhaust values caused by contaminated injection systems. Repeat treatment if problems reoccur. Suitable for all gasoline injection systems.

Application

For rectifying problems such as difficulties with starting, irregular idling, poor throttle response, performance losses, surges due to lean mixture and poor exhaust values caused by contaminated injection systems. Repeat treatment if problems reoccur. Suitable for all gasoline injection systems.

Technical data

Odor	characteristic
Color / appearance	yellow
Form	Liquid
Flash point	63 °C
Density at 15 °C	0,806 g/cm ³
Viscosity at 40 °C	2,0 mm ² /s

The figures above are not a specification. They are typical figures obtained within production tolerances.
